“Committed to providing a top quality, highly flexible manufacturing facility”

Overview

Established in 1977, Bailey Morris Ltd is the U.K.'s foremost specialist propshaft company. With facilities in both Cambridgeshire and West London (Feltham), we can ensure that our extensive stock provides the widest choice of leading brand products sourced from the world's foremost original equipment component manufacturers. We endeavour to provide our clients with a swift, efficient, flexible and cost effective solution for any propshaft application. Bailey Morris Ltd has built its reputation for exceeding customer expectations; achieved by using a combination of high quality parts, controlled manufacturing standards and considerable product knowledge. As a specialist manufacturer we provide a service for a diverse range of applications including automotive, commercial, off-highway and industrial applications. As part of our technical service we offer guidance on appropriate shaft recommendations, safe operating speeds and anticipated life-expectancy calculations.

Propshaft Manufacturing Specialists

We provide a wide range of propeller shafts for specialist requirements such as vintage, classic and kit car applications, 4x4 vehicles, P.T.O (power take-off) shafts, engine test cell applications, marine and industrial installations. This compliments our core business of propshafts for LCV, HGV, PSV and off-highway construction vehicles. We take pride in providing the most appropriate solution to meet your requirements.

Our flexible capacity means we can offer a complete range of services for the assembly of standard and custom-built propshafts, new or remanufactured propshafts, repairs, modifications and upgrades – all of this for both original equipment and aftermarket options. Whatever the application or customer specification, our facility can cater for small, medium or large scheduled production, prototype manufacture or single orders for a wide range of propshafts.

Bailey Morris Ltd endeavours to provide an 'All-Makes' propshaft and components programme covering popular vehicle marques such as:

**Benford
BMC
Caterpillar
Chrysler
DAF / Leyland
ERF
Foden
Ford
Honda**

**Hyundai
Iveco
JCB
Land Rover
MAN
Mercedes-Benz
Mitsubishi
Nissan
Plasser Theurer**

**Renault
Scania
Terex
Toyota
Triumph
Unimog
Vauxhall
Volkswagen
Volvo**

Popular items are often available from stock on either a new or service exchange basis. With our comprehensive facility for preparation, assembly, welding, straightening, dynamic balancing and finishing of propshafts, we are able to offer the complete service for any propshaft requirement.

**Little End Road
Eaton Socon
St Neots
Huntingdon
Cambridgeshire
PE19 8GE**

Distribution

Our comprehensive stock range enables us to provide a fast and efficient parts distribution service, covering the U.K., Europe and Worldwide. We source from all of the world's major components manufacturers, and we stock both original equipment and high-quality aftermarket products.

Our extensive inventory includes the following industry leading and widely recognised brand names; Klein, DANA Spicer, Sicit, GWB, GKN, Hardy Spicer, GMB, Matsuba, Elbe, Elso Gewes, Kempf and Tirsan Kardan. We stock a broad range of centre bearings, universal joints, flange yokes, weld yokes, slip-assemblies, splined mid-stubs, coupling flanges and propshaft specification tube. Whether your needs are for an urgent VOR (Vehicle-Off-Road) requirement, small scale ordering or for wholesale stocking purposes, our sales team can help with your individual requirements.

"We offer our clients a swift, flexible and positive response to their requirements"

"Due to the wide range of applications we are happy to offer technical support"

"Utilising road-freight, sea-freight and air-freight, we can get the parts you need to the place at which you need them."

Our Service

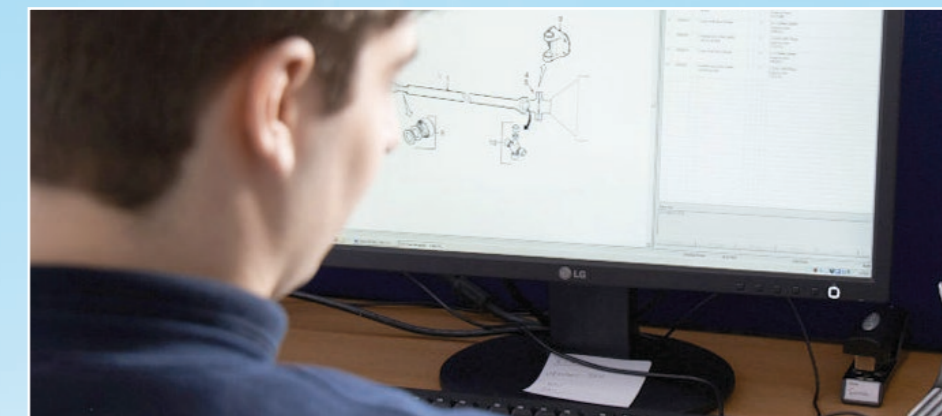

Parts Identification

Our service includes a parts identification program using vehicle registrations or Vehicle Identification Numbers (VIN). See below for the parts programmes available from us and feel free to call us with any kind of enquiry.

Technical Sales Support

For those questions that seem to have no answers, call our technical team at Bailey Morris. If you have an enquiry that isn't quite standard or you need some advice on, try us!

Next Day Delivery Service

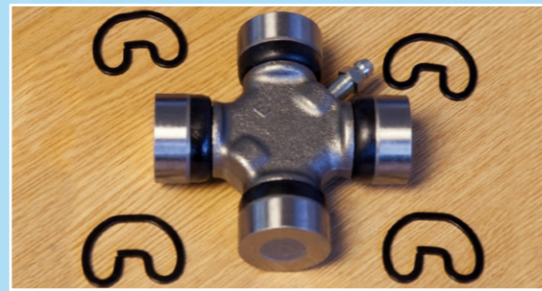

At Bailey Morris, we have the ability to supply our parts on a next day service. Using a range of courier companies, we have a next day solution for almost anywhere in the UK! If you have any questions about this service then give us a call.

Identifying Universal Joint

External Circlip Universal Joint

The most commonly used universal joint which is clearly identifiable. Beware that your clips may look different but they operate in the same way.

External Circlip Universal Joint Cap Diameter – Key Measurement “A”

With all universal joints, this measurement remains the same. Measure the diameter of the Universal Joint cap from edge to edge as pictured.

External Circlip Universal Joint Span – Key Measurement “B”

Ensuring that the caps are pressed on firmly, take your Vernier Caliper (or tape measure!) and measure the span from cap to cap.

Internal Circlip Universal Joint

Differing slightly from the External Circlip Universal Joint, this variety comes with “half-moon” clips that sit in the cap.

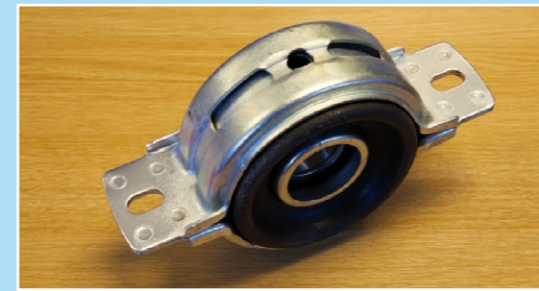

Internal Circlip Universal Joint Cap Diameter – Key Measurement “A”

The most commonly used universal joint which is clearly identifiable. Beware that your clips may look different but they operate in the same way.

Internal Circlip Universal Joint Span – Key Measurement “C”

The main difference between measuring an External Circlip Universal Joint and an Internal Circlip one is the span. The measurement needs to be taken between the circlip grooves as pictured.

Identifying Centre Bearings

Centre Support Bearing

Note: yours may look different but the key measurements remain the same!

Centre Support Bearing Diameter – Key Measurement “D”

The first measurement you take should be the diameter of the bearing. As pictured, take the measurement of the bearing hole diameter.

Centre Support Bearing Bolt Hole Centres – Key Measurement “E”

The next measurement should be the hole centres where the bearing bolts to the vehicle. Measure from centre-to-centre or from near edge to far edge (as pictured) as accurately as you can.

“Most importantly, if you need assistance, give us a call! 01480 216250”

Sales@baileymorris.co.uk

Product Range

- From SAE 0500 series to 1900 series flanged
- Open yoke and half round design including Scania style
- DIN 58mm flange to 250mm inclusive
- (KV) cross tooth 120mm to 200m
- Mechanics 2C - 15C J800
- Japanese/Asian type shafts
- Specialist dynamometer and engine test cell shafts
- Flexible drive couplings
- Please visit www.baileymorris.co.uk for more information about our company including our general parts catalogue
